TURN OFF WATER IS THREAT FOLLOWING METER DISPUTE

Company Notifies One Consumer of
Drastic Action One, Making
Eight Tenured.

That the water company will adopt drastic measures to enforce the installation of meters where they have been refused, is evidenced by the receipt of a notice by one patron, declaring that if payment is not tendered at the new flat rate within three days the water will be turned off. This notice was received on Wednesday and the time limit expires tomorrow. Whether the company will live up to its threat remains to be seen.

After this particular patron had refused to have a meter, a notice was sent out announcing that the quarterly rental would be increased about four dollars, the place having been rated as a boarding house and as such included in a low rate. When payment was tendered the old flat rate, the company officials refused it, and now comes the notice to pay or have the water shut off.

Not being able to live without water, the only alternative for this consumer is to submit to the installation of a meter.

No such notice has been served on Robert Norris or J. L. Schick, who had their meters torn out, and who both tendered payment at the old flat rate and had it refused. The company probably realizes that they would fight the case in the courts if necessary.

By Associated Press.

BUNICE, La., August 28.—Four persons were killed and three probably fatally injured today near Savole, Louisiana, when gasoline in a tank car exploded on the New Orleans and Mexico railway. The explosion occurred several hours after the car had been derailed in a wreck.

Wire communication to the scene was interrupted by the explosion. From last information available the known dead are Homer E. Baggett, assistant superintendent of the DeQuincy division of the road; M. Robinson, M. K. Nelson and George Pettit, all railroad employees. Three men were brought to a hospital here, probably fatally wounded.

The gasoline car was a part of a through freight train to New Orleans. Soon after the derailment a wrecking train was sent from DeQuincy in charge of Baggett.

The explosion occurred when a chain attached to the car and a derrick slipped, causing the car to tip and ignite the fuel.

FOREIGNER SHOTS HIMSELF IN FRONT OF WEST SIDE HALL

Comes From Mt. Pleasant
on Late Car and Com-
mits Suicide.

LEAVES NOTE TO TELL FAMILY

Dies Soon After He is Found Sitting
in Doorway of Slavish Hall, Having
Sent a Bullet Crashing Through
His Head; Was About 70 Years Old.

After coming to Connellville from Mount Pleasant on the 11:30 car last night, Mike Disman, 70 years old, sat down in the doorway of the Slavish Hall, on the West Side, and, placing a revolver to the back of his right ear, shot himself dead. When found about midnight, a note was pinned to the left lapel of his coat. Though stained with blood which saturated the man's clothing, the name Mike Disman, followed by the Slavish words "telefonica rebiu na S. H. Fouse grocery store, Mount Pleasant, Mrs. Disman" were discernable, indicating that S. H. Fouse at Mount Pleasant should be called by phone.

The body was found by George Blair, a young man of the West Side, on his way home. He had heard the shot several minutes before in the direction of the Slavish hall, and when he reached there, the upright figure of the old man, his shabby clothes stained with fresh blood, and a revolver lying a short distance away, greeted his sight. Life was then not extinct, but by the time Dr. S. H. Kress, who was summoned by Blair, arrived, Disman was dead. The body was removed to the undertaking parlors of J. E. Smith.

Inquiry at Mount Pleasant today revealed the fact that Disman leaves a wife and four children. He at one time conducted a butcher shop in that town, but of late had been little better than a tramp. In his pockets were found several letters written in Slavish, but on translation they proved nothing but personal matters.

Though the man's family was notified by Mr. Sims this morning, the body was still at his place at noon, no one having been able to claim it and remove it to Mount Pleasant for burial.

Richard Lannen, who was called by Blair after he discovered the suicide, recognized the old man as the one that had acted rather peculiarly on the 31:30 car. He had a piece of paper in his hand, which he read, folded up and then reread. After he got off the car, Lannen and Earl Richey watched the man walking up and down a front of the Slavish hall. He disappeared in the doorway and a short time later they found a shot.

SUES FOR DIVIDENDS
Wife of Missing Somerset Man Wants
Money Due Her.

SOMERSET, August 28.—Mrs. Emma Berkeley, of Cleveland, O., wife of Harvey M. Berkeley, the Somerset attorney who ascended from Somerset more than a year ago leaving the affairs of the Somerset Telephone Company in a sorry plight, instituted suit against the telephone company yesterday for \$108.50.

The plaintiff avers that the above sum is due her in dividends on one hundred and forty-four shares of the capital stock of the defendant company which she has owned since 1913. Mrs. Berkeley says that the directors of the telephone company declared dividends of one per cent on the par value of the capital stock of the company in October, 1913, and in January April and July, 1914. From the three first dividends, she received \$12.50 each time, instead of \$36.00, as was due her, and from the July dividend she received nothing, wherefore her suit has been instituted for the unpaid dividends she avers are due her.

LOOK FOR BUSINESS

Steel Men Hope Orders Will Develop from the Many Inquiries.

Pittsburgh steel companies hope that within the next 60 days, out of the vast amount of inquiry for steel coming to them from Europe and South America, there will develop actual business that will result in operations at the mills. At present inquiries for steel are being made and negotiations have been opened, but until a system of credits is established, or an understanding reached, it will not be possible to do business.

This was the explanation made by leading steel companies for the apparent lack of interest in getting out foreign steel orders. So far this week new inquiries for semi-finished steel, such as billets and sheet bars, came from England that amount to over 62,000 tons. There was other business tendered from Scotland amounting to 10,000 tons of small billets and other orders proposed call for sheets, pipes, bars and wire goods.

Last week inquiry was purchased for each for European markets. In such quantities that the suspended tin plate mills of the corporation in New Castle were ordered to resume after being closed because of the cancellation of orders for export business. Japanese trade also is coming to the steel men. The iron inquiries are reported for Japanese markets, Norway, Sweden and Denmark also have appeared for American steel and are urging acceptance of orders.

SHORT OF ORE

British Furnaces Find Foreign Iron Ore Market Difficult.

Embarrassments of British blast furnaces in obtaining needed foreign iron ore during the present war has been complicated upon by the Middlebrook, Eng., correspondent of the Iron and Coal Trades Review.

"The foreign ore position is one of considerable complexity. While consumers also would have carried them on well enough for some little time in normal conditions, the unexpected expansion of the demand for domestic iron has created what is in effect a shortage, and there are now anxiously looking around for new contracts. But are there could not be more awkwardly placed, for there is at the time of writing absolute uncertainty as regards shipments from Bilbao and other places."

"There is the difficulty of getting tonnage and the question of the war risks, and it is accordingly next to impossible to make quotations which consumers will listen to."

The plants were all grown from a small package of seed purchased the spring in a seed store of the West Side.

COAL OUTPUT BRIGHT

Railroads Begin Moving That Stored at Head of Lakes.

Pittsburgh coal operators are preparing to resume more actively in mining coal after next week, than at any time this year. All summer mining has been at low ebb. Not more than 35 per cent of the mining capacity has been employed owing to the congestion of coal on the northwestern storage docks and the lack of a market for that material which is due to the fact that the mining regions early in July, but this was impossible because of the lack of storage capacity.

During the present week reports came to the local news that the railroads are commencing to remove the stock coal on the Northwest. It is said will cause a return to work of many miners to full time. Many believe that it will employ all idle miners in the district.

In addition to the resumption of American points which will likely bring about shipments of fuel there from Pittsburgh about the middle of September. There is only one thing holding back shipments at this time, they say, which is the necessity of establishing financial relations with the new markets and it is being anticipated for at present.

BAND EXCURSION TONIGHT

Will Go to Pen Mar and Gettysburg Over Western Maryland.

The excursion of the Connellsville Military Band, to Pen Mar and Gettysburg tonight, will afford our residents an opportunity of seeing the world's greatest battlefield at small cost and they may rest assured it is the sight of a lifetime and one that should not be missed.

It followed by the blood of its heroes it has been set aside as a sacred spot that none may ever desecrate, where our mighty Government has cast its profoundest and noblest of all its monuments, the blood of its heroes.

Far away to the west, hardly mentioned in the eyes of the noble Rhine, still keeps its secret still. Big and little round top hills and other eminences rich in historic interest, rise above the valleys bearing on their crests the beautiful trophies of the South to their fallen heroes.

More than four hundred state monuments, the masterpieces of art of the various states, have been erected, four hundred and seventy tablets, the epitaphs of the spots of historic fame they mark, are placed on every side, over a thousand markers designate the positions of the various troops, and the same grim old cannon which breathed death over the very ground now stand in silent token of the harvest of devastation, while on all sides abound trophies of the triumphs that cost so dear a price.

These are the towers for observation purposes have been erected by the Government at the highest points giving birds-eye views of the entire battlefield. Over a hundred miles of magnificent roads have been constructed, giving easy access to all parts of the battlefield.

The band has said that the tickets are selling fast and everything indicates a large crowd.
